

## SPECIFICATION

Range: **OBELISCO**  
Design by: **Gio Ponti**

Free-standing sound absorbing element.

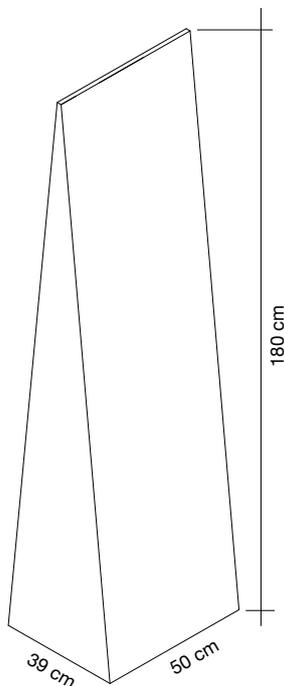

### Description:

Sound absorbing element composed of a steel base epoxy powder coated that supports multiple triangular panels, made of polyester, held together by aluminium tubes, tie rods and steel reinforcements. The whole is wrapped in a fabric made of multilayer polyamide and polyurethane, which in turn is covered with sound absorbing fabric "Snowsound Fiber 1 Color", removable and applied with Velcro to the base.

The outer fabric has received **Greenguard Gold** certification, indicating that they are VOC low-emitting products and do contribute to improve indoor air quality.

The outer fabric is **100% recyclable**, has no detectable formaldehyde contents, tested according to the UNI EN 717-2 and doesn't contain felt or other organic materials which are difficult to recycle.
