ARQUS

Harmonious design of the executive space

“

My goal was to update the executive area and the related furnishing elements, by maintaining the representative importance, but conferring it with lightness and dynamism. This was achieved thanks to a metal load-bearing structure, which is clearly architecturally inspired, fresh and customisable. This furniture is able to adapt to different contexts, while always maintaining its own personality.

ARQUS

Why did we name this collection ARQUS?

The metal leg conveys an architectural feel. Its shape, gracefulness, robustness and stability resemble an arch.
